The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Umeda (5,833,858) as further evidenced by Merck Index or if necessary in view of Strauss for reasons of record.

Applicant has amended the product claims to contain features of the process. This amendment has been considered but is not seen to overcome the rejection of the claims to the product. Process limitations do not materially alter the product, which is shown in Umeda. The fact that a product may have been made by a different process is not seen to carry patentable weight, particularly when the final product is dried to remove the solvents in the composition.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Umeda as further evidenced by Merck as applied to claims 1, 2 and 4 above, and further in view of Losch for reasons of record.

Applicant has amended the product claims to contain features of the process. This amendment has been considered but is not seen to

overcome the rejection of the claims to the product. Process limitations do not materially alter the product, which is shown in Umeda. The fact that a product may have been made by a different process is not seen to carry patentable weight, particularly when the final product is dried to remove the solvents in the composition.

Claims 8, 15-18 and 20-22 are allowed.
